FLAT
GLOSSA white glossa

GLOSSA

- veneer covering with high gloss effect,
- possibility of covering the door leaf with two veneer colours (each side of the door leaf in a different colour),
- thickness 0.4 - 0.5 mm,
- good mechanical resistance, resistance to light and stains and easy to clean,
- high utility value,
- no visible veneer joints on the edges of the rebated interior door leaf,
- in interior non-rebated doors, the veneer joint is located on the inner edge of the door leaf (hiding in the door frame).

DERBY
DI MODA dust gray matt

DI MODA

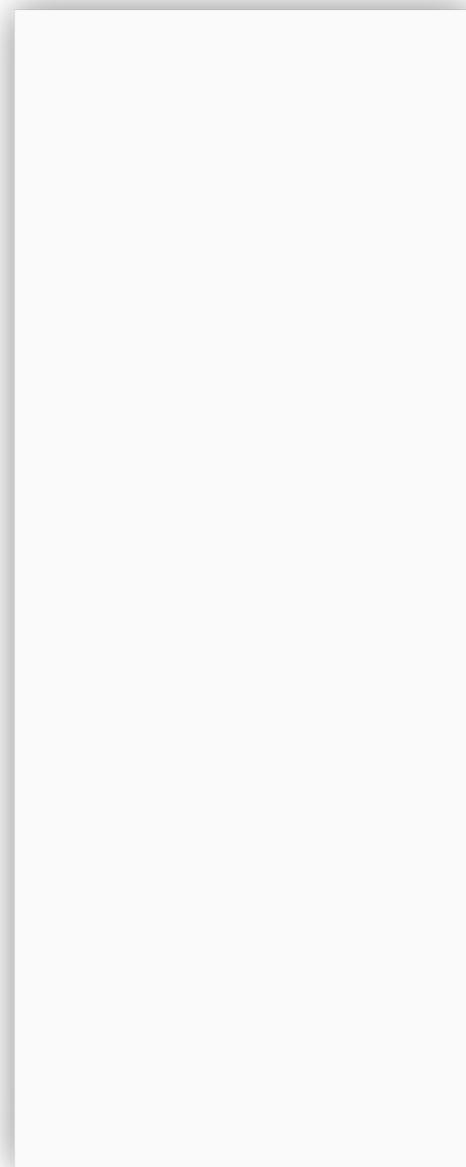

- covering with single-colour or wood-effect veneer,
- possibility of covering the door leaf with two veneer colours (each side of the door leaf in a different colour),
- thickness 0.3 - 0.5 mm,
- good mechanical resistance to scratches and abrasion, resistance to light and stains,
- ease of cleaning, which increases the utility value of the product,
- no visible veneer joint on the edges of the rebated door leaf,
- in interior non-rebated doors, the veneer joint is located on the inner edge of the door leaf (hiding in the door frame).
